INVESTIGATIVE OPHTHALMOLOGY

Editors

Editor

BERNARD BECKER
Professor of Ophthalmology
Washington University School of Medicine
St. Louis, Missouri

Editorial Board

JAMES H. ALLEN
Professor of Ophthalmology
Tulane University School of Medicine
New Orleans, Louisiana

ELMER J. BALLINTINE
Assistant Clinical Professor of Ophthalmology
Western Reserve University School of Medicine
Cleveland, Ohio

GOODWIN M. BREININ
Professor of Ophthalmology
New York University School of Medicine
New York, New York

JOHN E. HARRIS
Professor of Ophthalmology
University of Minnesota
Minneapolis, Minnesota

MICHAEL J. HOGAN
Professor of Ophthalmology
University of California Medical School
San Francisco, California

JIN H. KINOSHITA
Assistant Professor of Biological Chemistry
Harvard Medical School
Boston, Massachusetts

V. EVERETT KINSEY
Professor of Biological Sciences
Oakland University
Rochester, Michigan

PETER C. KRONFELD
Professor of Ophthalmology
University of Illinois College of Medicine
Chicago, Illinois

IRVING H. LEOPOLD
Director
Department of Ophthalmology, Mount Sinai Hospital
New York, New York

A. EDWARD MAUMENEE
Professor of Ophthalmology
Johns Hopkins University School of Medicine
Baltimore, Maryland

ALBERT M. POTTS
Professor of Ophthalmology
University of Chicago School of Medicine
Chicago, Illinois

LUDWIG VON SALLMANN
Chief, Ophthalmology Branch
National Institute of Neurological Diseases and Blindness
Bethesda, Maryland

GEORGE K. SMELSER
Professor of Anatomy
Columbia University College of Physicians & Surgeons
New York, New York

KENNETH C. SWAN
Professor of Ophthalmology
University of Oregon School of Medicine
Portland, Oregon

LORENZ E. ZIMMERMAN
Chief, Ophthalmic Pathology Branch
Armed Forces Institute of Pathology
Washington, D. C.

Subject index*

A

Abstracts of papers presented at Sectional Meetings of ARO, 109, 227, 353, 468, 617

Acid(s), alpha aminoisobutyric, accumulation by rabbit ciliary body–iris preparations (Wålinder), 67

^{14}C alpha aminoisobutyric, transport in galactose cataracts in rats and rabbit lenses incubated in high galactose media (Cotlier and Beaty), 77

amino, free, in aqueous fluid and lens of human eye, ion exchange chromatography (Dickinson, Durham, and Hamilton), 551

in senile cataractous lenses: possible osmotic etiology (Barber), 564

neutral, effect of sodium ions on transport by calf lens (Kern and Brassil), 452

fatty, composition, of retinal vasculature of normal and diabetic human eyes (Futterman and Kupfer), 105

neutral amino, characterization of transport by calf lens (Brassil and Kern), 441

Accommodation in monkeys induced by midbrain stimulation (Chin et al.), 386

^{14}C Alpha aminoisobutyric acid, transport in galactose cataracts in rats and rabbit lenses incubated in high galactose media (Cotlier and Beaty), 77

Amino acids, free, in aqueous fluid and lens of human eye, ion exchange chromatography (Dickinson, Durham, and Hamilton), 551

in senile cataractous lenses: possible osmotic etiology (Barber), 564

neutral, characterization of transport, by calf lens (Brassil and Kern), 441

effect of sodium ions on transport by calf lens (Kern and Brassil), 452

Aminoisobutyric acid, alpha, accumulation by rabbit ciliary body–iris preparations (Wålinder), 67

^{14}C alpha, transport in galactose cataracts in rats and rabbit lenses incubated in high galactose media (Cotlier and Beaty), 77

Announcements, 122, 236, 356, 474, 623, 709

Annuli, retinal arteriolar (Henkind and De Oliveira), 584

Aqueous fluid and lens of human eye, ion exchange chromatography of free amino acids in (Dickinson, Durham, and Hamilton), 551

formation rate, effect of ouabain on, in cats (Oppelt and White), 328

humor, effect of ocular hypertension caused by red cells on rate of formation (Bill), 162

outflow and intraocular pressure after fistulization of Schlemm's canal in vervet monkey (Dannheim), 300

Arteriolar annuli, retinal (Henkind and De Oliveira), 584

B

Bacterial endotoxin, effect on primary herpetic keratitis (Pollikoff et al.), 397

Binocular rivalry and visual evoked response (Lawwill and Biersdorf), 378

Book reviews, 621

C

Ca^{++}-free medium, effects of perfusion with, on corneal endothelium (Kaye et al.), 53

Cataractous lenses, senile, free amino acids in: possible osmotic etiology (Barber), 564

Cataracts, galactose, in rats and rabbit lenses incubated in high galactose media, transport of ^{14}C alpha aminoisobutyric acid in (Cotlier and Beaty), 77

human, proteins of, color and solubility (Pirie), 634

sugar, lens epithelium proliferation in (Grimes and von Sallmann), 535

Cells, Langerhans', in guinea pig cornea, response to chemical injury (Brown, Soderstrom, and Winkelmann), 668

red, effect of ocular hypertension caused by, on rate of formation of aqueous humor (Bill), 162

elimination from anterior chamber in vervet monkeys (*Cercopithecus ethiops*), 156

Chamber, anterior, elimination of red cells from, in vervet monkeys (Bill), 156

lymph node implantation: local adoptive immune response in eye (Eifrig and Prendergast), 293

perfusion technique, new anterior, topical epinephrine effects on true outflow resistance and pseudofacility in vervet monkeys studied by (Bárány), 88

Choroidal and retinal circulation, effect of raised intraocular pressure on (Dollery et al.), 191

Chromatography, ion exchange, of free amino acids on aqueous fluid and lens of human eye (Dickinson, Durham, and Hamilton), 551

*February, pp. 1-122; April, pp. 123-240; June, pp. 241-356; August, pp. 357-474; October, pp. 475-624; December, pp. 625-722.

Ciliary body–iris preparations, rabbit, accumulation of alpha aminoisobutyric acid by (Wålinder), 67
processes, rabbit, light and electron microscopic study of regional morphologic differences in (Kozart), 15
Color and solubility of proteins of human cataracts (Pirie), 634
Cone and rod contributions to off-effect of human ERG (Biersdorf), 371
Congenital glaucoma (Worst) (Symp.), 127
principles and problems of therapy in (Haas) (Symp.), 140
tonometry and tonography in (Hetherington and Shaffer) (Symp.), 134
hereditary corneal dystrophy, histological and ultrastructural pathology (Kenyon and Maumenee), 475
mesodermal anomalies and glaucoma (Weiss) (Symp.), 123
Convergence movements, fusional, dependence of amplitude, on velocity of eliciting stimulus (Ludvigh and McKinnon), 347
Cornea(s) of Diptera, interference filters in (Bernard and Miller), 416
frog, isolated, electrical potential profile (Candia, Zadunaisky, and Bajandas), 405
guinea pig, Langerhans' cells in, response to chemical injury (Brown, Soderstrom, and Winkelmann), 668
studies on: effects of perfusion with Ca^{++}-free medium on corneal endothelium (Kaye et al.), 53
swollen human, structural alterations affecting transparency in (Goldman et al.), 501
teleost, localization of sodium in (Edelhauser and Siegesmund), 147
Corneal dystrophy, congenital hereditary, histological and ultrastructural pathology (Kenyon and Maumenee), 475
Corneal—cont'd
endothelium, effects of perfusion with Ca^{++}-free medium on (Kaye et al.), 53
permeability to nonelectrolytes (Mishima and Trenberth), 34
rabbit, effect of ouabain on (Trenberth and Mishima), 44
epithelium or endothelium, absence, effect on stromal keratocytes (Dohlman, Gasset, and Rose), 520
Crystallins, beta, rabbit lens, subunit composition (Shapiro), 544

D

Diabetic and normal human eyes, fatty acid composition of retinal vasculature (Futterman and Kupfer), 105
Dichlorphenamide, plasma level, and probenecid, effect on time course; distribution of DMO in intraocular fluids (Constant), 334
Dicloxacillin, intraocular penetration of, in experimental animals (Records), 663
5,5-Dimethyl-2, 4-oxazolidinedione, distribution in intraocular fluids; effect of plasma level, probenecid, and dichlorphenamide on time course (Constant), 334
DNA viruses, oncogenic, in vitro neoplastic transformation of uveal and retinal tissue (Albert, Rabson, and Dalton), 357
Dystrophy, congenital hereditary corneal, histological and ultrastructural pathology (Kenyon and Maumenee), 475

E

Electrical potential profile of isolated frog cornea (Candia, Zadunaisky, and Bajandas), 405
Electrolytes, non-, permeability to corneal endothelium (Mishima and Trenberth), 34
Electron and light microscopic study of regional morphologic differences in processes of rabbit ciliary body (Kozart), 15
microscopic study of synapse formation, receptor outer segment development, and other aspects of developing mouse retina (Olney), 250
microscopy, scanning, of human ocular tissues, trabecular meshwork (Spencer, Alvarado, and Hayes), 651
Electrophoresis, starch-gel, of soluble lens proteins from normal and galactosemic animals (Holt and Kinoshita), 169
Electroretinogram, human, near absolute threshold of vision (Finkelstein, Gouras, and Hoff), 214
Electroretinographic responses of rabbit after x-irradiation (Devi, Riley, and Burns), 219
Endothelium, corneal, effects of perfusion with Ca^{++}-free medium on (Kaye et al.), 53
permeability to nonelectrolytes (Mishima and Trenberth), 34
rabbit, effect of ouabain on (Trenberth and Mishima), 44
or epithelium, corneal, effect of absence, on stromal keratocytes (Dohlman, Gasset, and Rose), 520
Endotoxin, bacterial, effect on primary herpetic keratitis (Pollikoff et al.), 397
Epinephrine, topical, effects on true outflow resistance and pseudofacility in vervet monkeys studied by new anterior chamber perfusion technique (Bárány), 88
Epithelium or endothelium, corneal, effect of absence, on stromal keratocytes (Dohlman, Gasset, and Rose), 520
proliferation, lens, in sugar cataracts (Grimes and von Sallmann), 535

ERG, human, rod and cone contributions to off-effect (Biersdorf), 371
and VER, simultaneous, in lesions of optic pathway (Jacobson, Hirose, and Suzuki), 279
Extraocular muscle, cat, evoked potentials in (Nemet and Miller), 592
rabbit, ultrastructural changes in, after oculomotor nerve section (Cheng-Minoda, Ozawa, and Breinin), 599

F

Fatty acid composition of retinal vasculature of normal and diabetic human eyes (Futterman and Kupfer), 105
Filters, interference, in corneas of Diptera (Bernard and Miller), 416
Fistulization of Schlemm's canal, intraocular pressure and aqueous outflow after, in vervet monkey (Dannheim), 300
Fundus photography, red-free light (Mizuno et al.), 241
Fusional convergence movements, amplitude, dependence on velocity of eliciting stimulus (Ludvigh and McKinnon), 347

G

Galactose cataracts in rats and rabbit lenses incubated in high galactose media, transport of ^{14}C alpha aminoisobutyric acid in (Cotlier and Beaty), 77
Galactosemic and normal animals, starch-gel electrophoresis of soluble lens proteins from (Holt and Kinoshita), 169
Glaucoma, congenital (Worst) (Symp.), 127
principles and problems of therapy (Haas) (Symp.), 140
tonometry and tonography in (Hetherington and Shafer) (Symp.), 134
and congenital mesodermal anomalies (Weiss) (Symp.), 123

H

Herpetic keratitis, primary effect of bacterial endotoxin on (Pollikoff et al.), 397
Humor, aqueous, effect of ocular hypertension caused by red cells on rate of formation (Bill), 162
formation rate, effect of ouabain on, in cats (Oppelt and White), 328
Hypertension, ocular, effect caused by red cells on rate of formation of aqueous humor (Bill), 162

I

Intraocular fluids, distribution of 5, 5-dimethyl-2, 4-oxazolidinedione in; effect of plasma level, probenecid, and dichlorphenamide on time course (Constant), 334
pressure and aqueous outflow, after fistulization of Schlemm's canal in vervet monkey (Dannheim), 300
effect of raised, on retinal and choroidal circulation (Dollery et al.), 191
Ion exchange chromatography of free amino acids in aqueous fluid and lens of human eye (Dickinson, Durham, and Hamilton), 551
Ions, sodium, effect on transport of neutral amino acids by calf lens (Kern and Brassil), 452
Iris–ciliary body preparations, rabbit, accumulation of alpha aminoisobutyric acid by (Wålinder), 67

K

Keratitis, primary herpetic, effect of bacterial endotoxin on (Pollikoff et al.), 397
Keratocytes, stromal, effect of absence of corneal epithelium or endothelium on (Dohlman, Gasset, and Rose), 520

L

Langerhans' cells in guinea pig cornea, response to chemical injury (Brown, Soderstrom, and Winkelmann), 668
Lens(es) and aqueous fluid of human eye, ion exchange chromatography of free amino acids in (Dickinson, Durham, and Hamilton), 551
beta crystallins, rabbit, subunit composition (Shapiro), 544
calf, characterization of transport of neutral amino acids by (Brassil and Kern), 441
effect of sodium ions on transport of neutral amino acids by (Kern and Brassil), 452
purification and characterization of highly labeled protein fraction from (Spector, Wandel, and Li), 179
epithelium proliferation in sugar cataracts (Grimes and von Sallmann), 535
protein polypeptides studies on (Shapiro) 462
proteins, soluble, from normal and galactosemic animals, starch-gel electrophoresis (Holt and Kinoshita), 169
rats and rabbit, incubated in high galactose media, transport of ^{14}C alpha aminoisobutyric acid in galactose cataracts in (Cotlier and Beaty), 77
senile cataractous, free amino acids in: possible osmotic etiology (Barber, 564
Lesions of optic pathway, simultaneous ERG and VER in (Jacobson, Hirose, and Suzuki), 279
Light and electron microscopic study of regional morphologic differences in processes of rabbit ciliary body (Kozart), 15

Lymph node, anterior chamber, implantation: local adoptive immune response in eye (Eifrig and Prendergast), 293
Lysozyme, in nonstimulated tears, detection and quantitation; rabbit tear proteins (Bonavida, Sapse, and Sercarz), 435

M

Mesodermal anomalies, congenital, and glaucoma (Weiss) (Symp.), 123
Midbrain stimulation, accomodation in monkeys induced by (Chin et al.), 386
Muscle, cat extraocular, evoked potentials in (Nemet and Miller), 592
rabbit extraocular, ultrastructural changes in, after oculomotor nerve section (Cheng-Minoda, Ozawa, and Brienin), 599

N

Neoplastic transformation, in vitro, of uveal and retinal tissue by oncogenic DNA viruses (Albert, Rabson, and Dalton), 357
Nerve, optic, pathology, in experimental acute glaucoma (Lampert, Vogel, and Zimmerman), 199
section, oculomotor, ultrastructural changes in rabbit extraocular muscles after (Cheng-Minoda, Ozawa, and Breinin), 599

O

Obituary, Kenneth N. Ogle (Boeder), 234
Ocular hypertension, effect caused by red cells on rate of formation of aqueous humor (Bill), 162
tissues, human, scanning electron microscopy of, trabecular meshwork (Spencer, Alvarado, and Hayes), 651
Oculomotor nerve section, ultrastructural changes in rabbit extraocular muscles after (Cheng-Minoda, Ozawa, and Breinin), 599
Ophthalmologists, training in basic sciences for (Adler), 9
Optic cup symmetry in normal newborn infants (Richardson) (Symp.), 137
nerve, pathology, in experimental acute glaucoma (Lampert, Vogel, and Zimmerman), 199
pathway, simultaneous ERG and VER in lesions (Jacobson, Hirose, and Suzuki), 279
Ora serrata region in primate eyes, some fine structural features (Pei and Smelser), 672
Osmotic etiology, possible: free amino acids in senile cataractous lenses (Barber), 564
Ouabain, effect on aqueous humor formation rate in cats (Oppelt and White), 328
on rabbit corneal endothelium (Trenberth and Mishima), 44

P

Perfusion, reverse, attempts at, of trabecular meshwork in different monkey species (Dannheim and Bárány), 305
technique, new anterior chamber, topical epinephrine effects on true outflow resistance and pseudofacility in vervet monkeys studied by (Bárány), 88
Permeability of corneal endothelium to nonelectrolytes (Mishima and Trenberth), 34
Photography, red-free light fundus (Mizuno et al.), 241
Plasma level, probenecid, and dichlorphenamide, effect on time course; distribution of DMO in intraocular fluids (Constant), 334
Polypeptides, lens protein, studies on (Shapiro), 462
Pressure, intraocular, and aqueous outflow after fistulization of Schlemm's canal in vervet monkey (Dannheim), 300
raised, effect on retinal and choroidal circulation (Dollery et al.), 191
Probenecid, plasma level, and dichlorphenamide, effect on time course; distribution of DMO in intraocular fluids (Constant), 334
Proctor Medal of ARO, remarks made on its presentation to Francis Heed Adler (Kinsey), 2
to Antoinette Pirie (Kinoshita), 626
Award, remarks made on acceptance (Adler), 6
(Pirie), 628
Program for Annual Meeting, ARO, 109
Protein(s) fraction, highly labeled, purification and characterization, from calf lens (Spector, Wandel, and Li), 179
of human cataracts, color and solubility (Pirie), 634
polypeptides, lens, studies on (Shapiro), 462
rabbit tear; detection and quantitation of lysozyme in nonstimulated tears (Bonavida, Sapse, and Sercarz), 435
soluble lens, from normal and galactosemic animals, starch-gel electrophoresis (Holt and Kinoshita), 169
Pseudofacility and true outflow resistance, topical epinephrine effects on, in vervet monkeys studied by new anterior chamber perfusion technique (Bárány), 88

R

Receptor outer segment development, synapse formation, and other aspects of developing mouse retina, electron microscopic study (Olney), 250
Red cells, effect of ocular hypertension caused by, on rate of formation of aqueous humor (Bill), 162
elimination from anterior chamber in vervet monkeys (*Cercopithecus ethiops*) (Bill), 156
Red-free light fundus photography (Mizuno et al.), 241

Resistance, true outflow, and pseudofacility, topical epinephrine effects on, in vervet monkeys, studied by new anterior chamber perfusion technique (Bárány), 88
Response, electrically evoked, of visual system (Potts, Inoue, and Buffum), 269
local adoptive immune, in eye: anterior chamber lymph node implantation (Eifrig and Prendergast), 293
visual evoked, and binocular rivalry (Lawwill and Biersdorf), 378
Retina, developing mouse, synapse formation, receptor outer segment development, electron microscopic study (Olney), 250
inferior, absolute threshold defect in (Krill et al.), 701
Retinal anterior annuli (Henkind and De Oliveira), 584
and choroidal circulation, effect of raised intraocular pressure on (Dollery et al.), 191
and uveal tissue, in vitro neoplastic transformation, by oncogenic DNA viruses (Albert, Rabson, and Dalton), 357
vasculature, fatty acid composition, of normal and diabetic human eyes (Futterman and Kupfer), 105
vessels, earliest stages of formation (Shakib, De Oliveira, and Henkind), 689
immature, new method for studying, in vivo (Flower, Patz, and Speiser), 366
Rod and cone contributions to off-effect of human ERG (Biersdorf), 371

S

Scanning electron microscopy of human ocular tissues, trabecular meshwork (Spencer, Alvarado, and Hayes), 651
Schlemm's canal, intraocular pressure and aqueous outflow after fistulization, in vervet monkey (Dannheim), 300
Sciences, basic, training in, for ophthalmologists (Adler), 9
Sodium ions, effect on transport of neutral amino acids by calf lens (Kern and Brassil), 452
localization in teleost cornea (Edelhauser and Siegesmund), 147
Solubility and color of proteins of human cataracts (Pirie), 634
Starch-gel electrophoresis of soluble lens proteins from normal and galactosemic animals (Holt and Kinoshita), 169
Stromal keratocytes, effect of absence of corneal epithelium or endothelium on (Dohlman, Gasset, and Rose), 520
Synapse formation, receptor outer segment development, and other aspects of developing mouse retina, electron microscopic study (Olney), 250

T

Tear proteins, rabbit; detection and quantitation of lysozyme, in nonstimulated tears (Bonavida, Sapse, and Sercarz), 435
Teleost cornea, localization of sodium in (Edelhauser and Siegesmund), 147
Threshold defect, absolute, in inferior retina (Krill et al.), 701
Tissue, uveal and retinal, in vitro neoplastic transformation, by oncogenic DNA viruses (Albert, Rabson, and Dalton), 357
Tonography, clinical, some basic statistics (Kronfeld), 319
and tonometry in congenital glaucoma (Hetherington and Shaffer) (Symp.), 134
Tonometry and tonography in congenital glaucoma (Hetherington and Shaffer) (Symp.), 134
Trabecular meshwork, attempts at reverse perfusion, in different monkey species (Dannheim and Bárány), 305
of human ocular tissues, scanning electron microscopy of (Spencer, Alvarado, and Hayes), 651
Transparency, structural alterations affecting, in swollen human corneas (Goldman et al.), 501

U

Uveal and retinal tissue, in vitro neoplastic transformation, by oncogenic DNA viruses (Albert, Rabson, and Dalton), 357

V

Vasculature, retinal, fatty acid composition, of normal and diabetic human eyes (Futterman and Kupfer), 105
Velocity of eliciting stimulus, dependence of amplitude of fusional convergence movements on (Ludvigh and McKinnon), 347
VER and ERG, simultaneous, in lesions of optic pathway (Jacobson, Hirose, and Suzuki), 279
Vessels, immature retinal, new method for studying, in vivo (Flower, Patz, and Speiser), 366
Viruses, oncogenic DNA, in vitro neoplastic transformation of uveal and retinal tissue by (Albert, Rabson, and Dalton), 357
Vision, human electroretinogram near absolute threshold (Finkelstein, Couras, and Hoff), 214
Visual system, electrically evoked response (Potts, Inoue, and Buffum), 269

X

X-irradiation, electroretinographic responses of rabbit after (Devi, Riley, and Burns), 219
